

No-Fluff Article System™ skill

Four steps, about a minute, one-time. Once it's in, you can turn a rough idea into a titled, structured Substack article — with CTAs, settings guidance, and a humanize pass — right inside your own Claude, on your own usage, whenever you bring one in.

FOUR STEPS

01 Download the skill

Grab `no-fluff-article-system-skill.zip` — it's in this download.

02 Open Claude's Skills settings

In Claude, go to **Settings** → **Capabilities** → **Skills**, then click **Upload skill**.

03 Select the zip you just downloaded

Claude installs it straight away — no restart, no extra setup, nothing to configure.

04 Bring a rough idea, in any chat

A voice note, a bullet list, a half-formed thought — plus two or three lines of your own writing so it sounds like you. The skill builds the title, the article, both CTA blocks, and the humanize pass automatically.

WHAT IT COVERS IN ONE PASS

Title options, article structure, both paid and free CTA blocks, a Substack settings checklist, and a humanize pass that reduces the sentence patterns AI detectors flag — never a fabricated claim or number.

NO INSTALL AT ALL — USE IT IN YOUR BROWSER

article.founders.systems

Paste a rough idea, get the whole thing back. Free, no login, runs on our AI — not yours.

Prefer chat?

The same system also runs as a ChatGPT GPT — one link, no setup at all.
